RECEIVER AND MOTOR UNIT

FOR BOTH
465MC AND
27.155MC

"Examination Free"
FREQUENCIES

Designed and tested by Lou Andrews - - -

After a solid year of design and testing, the Trixter Beam is now ready to thrill you with its top performance and stability.

It has successfully undergone a series of tests that prove it can easily handle the full equipment of the MacHabb 465 receiver, Banner compound escapement and motor control units. In addition there is plenty of fuselage space for all radio gear plus working room for your hands.

Completely prefabricated,

the BEAM boasts such outstanding features as tricycle landing gear, removable escapement, receiver and motor units and exceptionally graceful lines reminiscent of the Aeronca Champion.

The BEAM is an excellent free flight sport flyer that can be flown without radio controls. Visit your dealer today and examine this new Guillow Kit — you will be pleasantly surprised with one of the top values of the year.

SPECIFICATIONS

Wing Span	56.25"
Wing Chord	8.25"
Effective Area	372"
Body Length	35.25"
